• Assisted in the development of branding materials, including logos, business cards, and marketing collateral, to maintain a cohesive brand image across all platforms.

• Participated in client meetings to gather feedback and make revisions to designs, resulting in high client satisfaction and repeat business.

Project Work

- **Recipe Blog**
  Languages Used: HTML, CSS, PHP
  This project is a web application that allows users to browse, view, and print recipes. Users can create an account by signing up or log in to access additional features. The application also integrates a database to manage user accounts and recipe data effectively.

- **Fruits and Herbs Shopping Application**
  Tools Used: Android Studio
  This project is an Android application designed for purchasing fruits and herbs online. It provides features such as user login, adding items to a shopping cart, and making payments securely. The application aims to offer a seamless shopping experience.

- **Report Card Management**
  Languages Used: C, C++
  This mini-project facilitates the management of student report cards. It enables users to add student details, view report cards, and modify them when needed. The program is a simple yet efficient solution for handling report card data.

Certifications

- **Completion of Introduction to Cisco Packet Tracer**
  A foundational course introducing Cisco's Packet Tracer, a simulation tool for network design and troubleshooting.
- **Desktop Publishing includes Adobe Creative Cloud, Corel Draw**
  Training on professional design and publishing tools to create visual content like brochures, flyers, and layouts.
- **CCNA: Introduction to Networks**
  Part of Cisco's CCNA certification, focusing on fundamental networking concepts and principles.
- **Completion of Linux Server Management and Security**
  Covers managing and securing Linux servers, focusing on system administration and protection.
- **Cutshort Certified HTML/CSS**
  Certification validating proficiency in building and styling web pages using HTML and CSS.
- **Explore Machine Learning using Python** –
  Introductory course of Infosys Springboard on applying Python for machine learning concepts, algorithms, and tools.
